ABOUT US

INELTRÓN is a multinational company specialized in engineering, construction, commissioning, and maintenance services for electrical, instrumentation, and industrial control systems.

Founded in 2016 and headquartered in Betanzos, Spain, the company operates across various sectors, including renewable energies, power generation, transmission and distribution, oil and gas and others. Its highly qualified staff enables **INELTRÓN** to stay updated and adapt its services to the latest market technologies.

OUR BACKGROUND

2016

Foundation

2017

1st oil & gas project, Russia

2018

Branch established in Portugal

2019

3rd and biggest biomass plant, Spain

OUR NUMBERS

Our growth at **INELTRÓN** is reflected in every figure, every project, and every strategic partnership. We continue moving forward with a clear vision: to innovate, improve, and always deliver the best to our clients.

+ **90**

Projects delivered

+ **2,500**

MWp in PV power plants installed

+ **25**

Substations completed

+ **14**

Oil & Gas and biomass E&I projects executed

INDUSTRIES & MARKETS

YOUNG SPIRIT. TALENTED PEOPLE. PROVEN EXPERIENCE.

GLOBAL *mindset*

2020

1st substation completed

2021

First wind farm and PV plant completed

2022

Branch established in Lithuania

2023

+700 MWp in wind farms we have worked in

2024

+27 M€ biggest contract signed

2025

+100 employees, +50 M€ construction backlog

INDUSTRIAL PLANTS: ELECTRICAL, AUTOMATION & CONTROL

Design, assembly, and commissioning of industrial electrical, instrumentation, and control systems across various sectors.

Our specialists oversee all phases—from installation and supervision to final testing and ongoing maintenance during operation.

SERVICE
360
From engineering
to maintenance

At INELTRÓN we **guarantee effective and optimised solutions** that ensure the viability and success of national and international projects.

RENEWABLE ENERGIES

INELTRÓN offers a complete service for the design, construction and commissioning of renewable energies power plants.

Optimization, problem-solving and the best project management practices are at the core of our tailored solutions that meet and exceed our client requirements and expectations.

INELTRÓN has
broad experience in:

EPC / BOS contracts for PV plants

Electrical subcontracts for MV
facilities in wind farms

EI&C subcontracts for biomass
power plants

SUBSTATIONS & POWER LINES

Turnkey projects for substations and high-voltage power lines.

As an EPC Contractor, INELTRÓN offers a wide range of solutions, including engineering, procurement, construction and commissioning of substations and medium, high and very high voltage power lines, applying the highest quality standards.

Highly experienced in **transmission and distribution networks**, as well as in substations related to renewable energies, generation plants and industrial plants.
