Protecting people,
the environment & customer assets

FPE SONTUM

Quality and precision

since 1977

Fire safety for the future

The history of FPE Sontum began in 2017 when two highly reputable companies within the fire and safety industry joined forces to become a market leading supplier of active firefighting systems and equipment. Together FPE and Sontum had a powerful combination of experienced engineers, state of the art production facilities, a well-established supply chain and competent field technicians. Our company is more than capable of taking the responsibility for complete system deliveries, equipment refurbishment and upgrade work, as well as testing, maintenance, and recertification. FPE Sontum represents competence at all levels, based on decades of experience, providing extinguishing systems complying to client requirements.

Any fire could have devastating consequences to lives, assets, and the environment. Unfortunately, several fires are attributed to a lack of maintenance and safety system integrity. Therefore, FPE Sontum consider our systems and service deliverables as more than just an investment in safety. They are in fact an investment in the overall protection of human lives, company assets, the environment as well as a company's reputation.

At FPE Sontum we do not compromise on safety and security. Our business model and our client focus are aimed to prevent or reduce the effect of any major incidents.

As stated in our values, our clients are the reason for our success, and we are committed to protect people, the environment, and our customers assets.

Sincerely,

Raymond Stokken
Managing Director
FPE Sontum AS

Decades of experience

Our journey brings together decades of expertise, innovation, and key industry milestones. This timeline shows how we've evolved—from our origins in the late 1970s to today—shaping FPE Sontum into the trusted firefighting solutions provider we are now.

Our vision and values

Our vision is clear – We protect people, we protect the environment, and we protect customer assets. It's a promise that guides every decision we make and every solution we deliver.

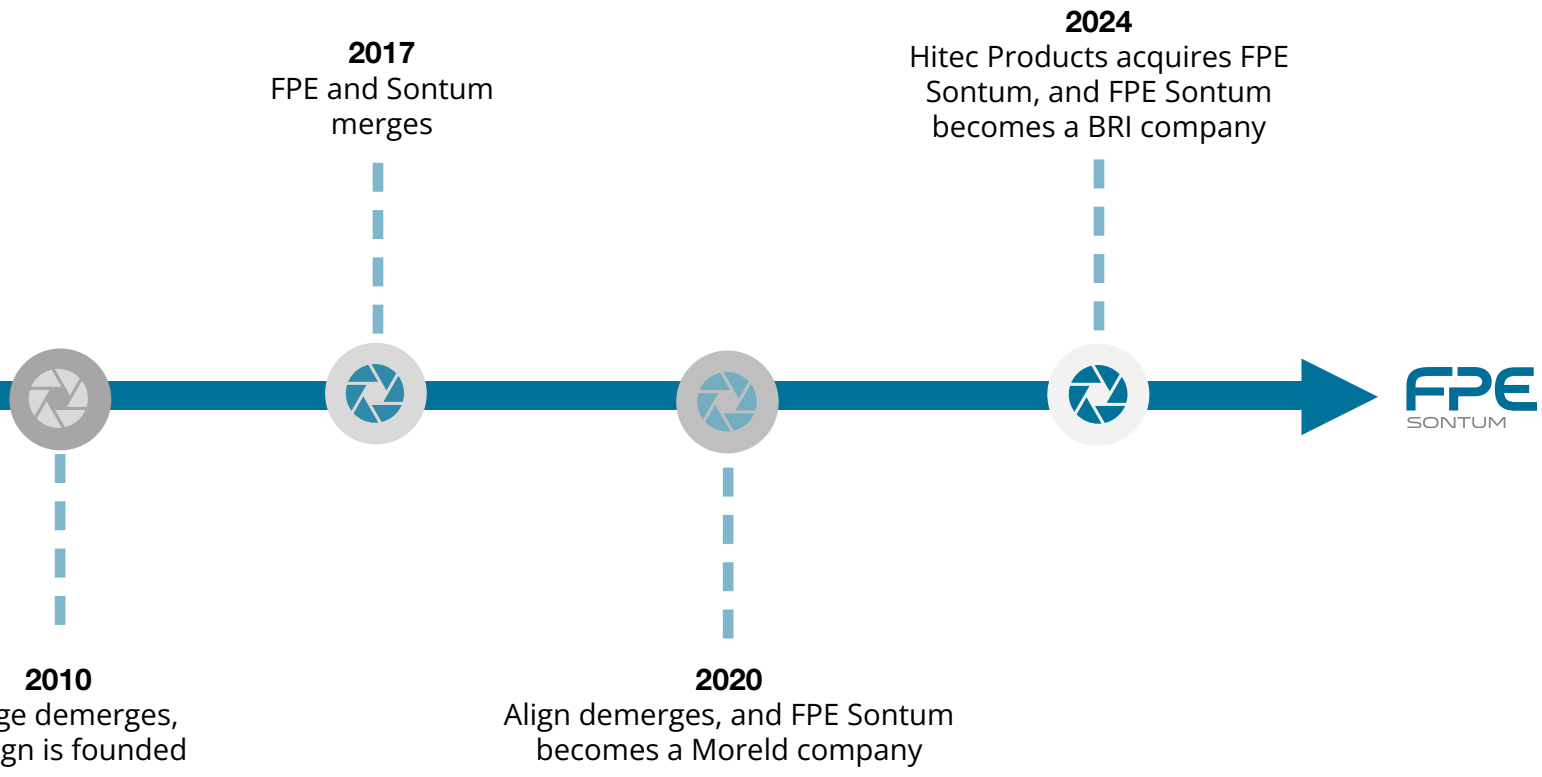
This commitment is reflected in our four core values:

Safety first – We never compromise on health, safety, or security.

Customer focused – Our customers are the reason for our success, and we listen and adapt to meet their needs.

Sustainable – We act responsibly, considering our impact on the environment, people, and communities.

Creating values – We have a strong commercial mindset and seek cost-effective solutions for the market.



Our products

Built for performance. Trusted worldwide.

Deluge systems

Delivers a powerful flow of water (and optionally foam) for rapid extinguishment and cooling across critical areas.

Central foam systems

Provides pressurized foam to various suppression points – maximizing control over hydrocarbon fires.

Hydrophores

Balances pressure and ensures stable firewater flow across offshore installations.

Water mist systems

Fine spray systems for enclosed or sensitive areas, tested to NFPA 750 and IMO standards.

Gaseous systems

Inert gas suppression (Inergen, Novec, Argonite) for total flooding in high-risk or sensitive environments.

Helideck systems

Pop-up nozzle systems ensure uniform foam/water coverage for helideck fire protection.

Dual-agent hose reels

Manual firefighting units combining powder and foam or water for fast, flexible response.

Monitors

High-capacity water cannons for remote-controlled fire suppression in exposed or difficult areas.

Hose reels

Ready-to-use hose units for manual firefighting – quick access with minimal setup.

Hydrants

Strategically placed for manual firefighting and personal safety in open spaces.

Test facilities

Full-scale in-house testing ensures system performance and regulatory compliance.

Together, these active firefighting solutions reflect our vision and values - delivering safety, performance, customer-aligned design, sustainable practices, and real value in every installation.

FPE Service & Modification

Fire safety systems are only as good as the care they receive. That's why our service and modification team works to keep your systems performing at their best year after year. Whether it's an upgrade to meet new regulations, a tailored modification for unique operational needs, or a complete refurbishment, we deliver solutions that extend system life, boost reliability, and ensure compliance.

From planning and installation to testing and commissioning, our experts handle every step with precision so you can focus on operations, knowing your protection is in the best hands.

Our Global Impact

FPE Sontum's footprint spans the globe – safeguarding lives, assets, and environments in some of the world's most demanding locations. From the stormy North Sea to the warm waters off West Africa, from high-tech hubs in Asia to energy giants in the Americas – our systems stand ready when it matters most.
Wherever the project, whatever the challenge, we bring decades of expertise and a complete firefighting lifecycle under one roof – delivering safety without borders.

MisteryHood – PFAS Free!
Deep Fat Fryer & Tilt Skillet Protection

- Unlimited Discharge Media (by sprinkler system water supply),
- Minimal Food Loss and Clean up Time,
- Easy & immediate return to service,
- UL-listed, tested to UL199E

Almost 50% of all accidental fires in hotels, restaurants and fast-food outlets start in the kitchen and the majority of these involve cooking oil or fat. Without effective suppression, cookingoil fires can cause serious damage to property and loss of life.

Mandals Guardman

Norwegian Quality. Offshore Reliability.

Mandals is proud of our long-standing partnership with FPE Sontum – delivering high-performance fire hoses to the global energy industry.

As a Norwegian manufacturer, we've supported offshore operations with durable, low-maintenance fire hoses for decades. Founded in 1775, we are today one of the world's most recognized manufacturers of lay-flat hoses.

Mandals Guardman is built for the roughest environments:
- Wide temperature range: -30°C to +75°C
- Resistant to UV, oil, and microbial attack
- Easy handling and low maintenance
- Proven long service life, especially in demanding offshore conditions
- Innovative design with extrusion through-the-weave technology

C300 DELUGE WATER CONTROL VALVES

The GW C300 Series deluge valves ensure reliable performance in demanding environments like offshore platforms and the petrochemical industry.

Available as:
Pressure Reducing, Pump Control, and Sprinkler Control Valves

Materials:
Nickel-Aluminium-Bronze, Super Duplex Cr25 Steel, Titanium

Key Features:
Low maintenance, no moving mechanical parts in contact with water
Soft start & stop, adjustable opening/closing speed
Sizes: 3"–12", Flow: 100–45,000 lpm
FM Approved, NORSOK M650, NFPA compliant
Installed worldwide to protect offshore and critical installations.

GW Sprinkler develops, manufactures and distributes a wide range of state-of-the-art water control and delivery devices for sprinkler, deluge, water spray and low-pressure water mist systems.

Fighting Fire with Technology for over 65 years
