

Your **preferred** partner
in the **food industry**

Established Partner with Proven Progress

When choosing business partners, proven growth and solid experience are decisive factors. Within just a few years, 2M Carnitech has undergone a remarkable transformation: From a small company with 15 employees and 1,000 m² facilities to a modern industrial enterprise with 60 employees and 7,000 m² of production space. That is your guarantee that we can handle even the most complex projects, and that you get a partner who understands the importance of scalability and capacity.

We have built a position that sets us apart from the many small players and the few very large competitors. Our size is your advantage: You benefit from competitive prices and the flexibility to handle both small and large orders without compromising on quality. Our growth is no coincidence – it is the result of a focused strategy where efficiency, reliability, and proactive development are at the core.

We have a clear ambition to be the preferred supplier of automation solutions for the food industry – both nationally and internationally. Our organization is built to deliver results, and we always prioritize your goals and needs over our own standard solution. You don't just get a supplier, but a competent partner dedicated to strengthening your competitiveness.

Our approach is simple: We deliver what we promise, on time – every time. You can trust that we never compromise on quality, and that we always think long-term. This means less downtime, fewer repairs, and a partnership where your success is our goal.

Optimal Production and Unique Design Department – Your Access to Efficient Solutions

You gain access to one of the industry's most modern production facilities with ample space, creating a capacity that can support both large and small projects. Our facilities are designed to handle complex tasks efficiently, ensuring you high delivery reliability and flexibility.

A significant competitive advantage for you is our large in-house design department. all solu-

tions are designed internally, ensuring a fast and direct dialogue between development and production. This close integration means your projects can be continuously optimized and adjusted – without delays or misunderstandings. It is your guarantee that the solutions always meet your specific requirements and are delivered on time.

Idoc A/S – Når konstruktion, design og projektledelse skal spille sammen

Vi leverer specialiserede ingeniørydelser inden for mekanisk konstruktion, produktudvikling, teknisk dokumentation og projektledelse.

Med dyb brancheforståelse og et skarpt øje for kvalitet hjælper vi nogle af Danmarks førende virksomheder i bl.a. forsvar, energi, fødevarer og medico.

Din tekniske
Samarbejdspartner

Our position in the market allows us to compete on price with the largest players while still delivering the flexibility and proximity you often only find in smaller companies. We have established a culture where collaboration and knowledge-sharing across departments are highly valued. This means you benefit from a team working purposefully to create

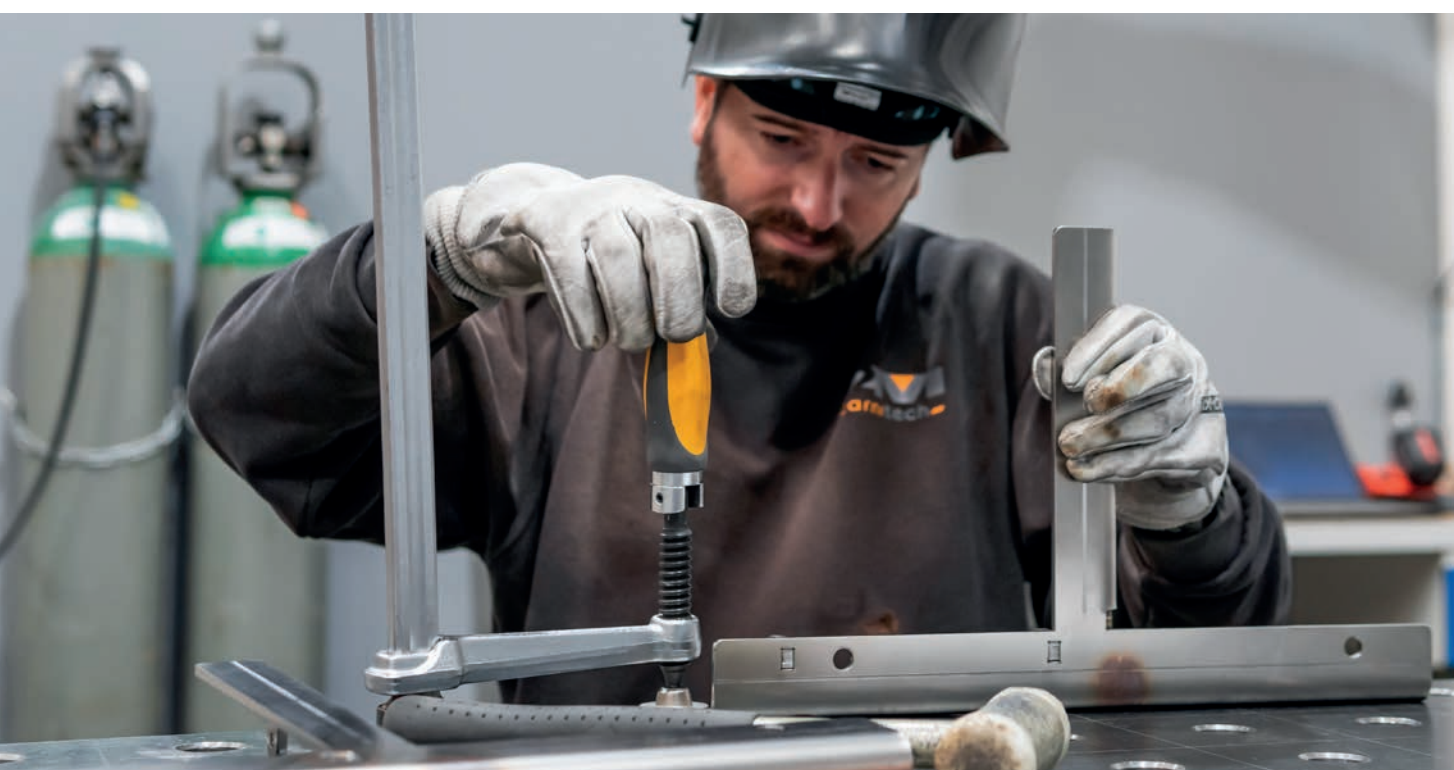

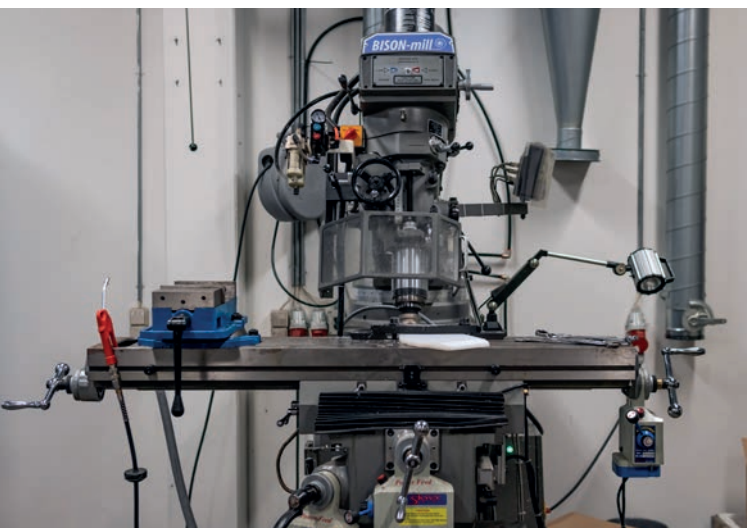

value for you – not just at project start, but throughout the entire lifetime of your solution.

At 2M Carnitech, we continuously invest in both technology and employee competencies to ensure you have access to the most advanced and durable solutions on the market. With us as your partner, you are always ahead of the curve.

Turnkey Solutions, Inspection Systems, and Special Machinery for the **Food Industry**

Your business needs solutions that optimize the entire value chain. At 2M Carnitech, you gain access to a complete range covering everything from turnkey plants to inspection systems and specialized machinery. We deliver solutions tailored to your needs.

Turnkey Plants: Get the entire process in one place. We deliver everything from design and construction to installation and commissioning. With our turnkey solutions, you get one supplier who takes responsibility for the entire project, eliminating wasted time and coordination challenges.

Inspection Systems: Food safety is critical. Our solutions include metal detectors and advanced X-ray systems that ensure compliance with the market's strict requirements. You gain documented traceability and reduce the risk of production stop-pages and recalls.

Special Machinery: We offer everything from packaging machines and multiwrappers to rib saws and lifting equipment. Our wide product portfolio means

you can consolidate all your needs in one place. We advise you every step of the way, ensuring you receive a solution that strengthens your productivity and reduces costs in the long term.

You can expect all our products and solutions to be developed with a focus on durability, efficiency, and easy maintenance. We never compromise on quality – for you, that means fewer repairs and maximum uptime.

VI ER SPECIALISTER I BEJDSNING OVERFLADEBEHANDLING OG BEJDSNING AF RUSTFRIT STÅL OG ALUMINIUM

Strong Partnerships That Strengthen Your Business

When you collaborate with 2M Carnitech, you gain not only access to technical expertise but also a partner who has delivered proven results for both local and international customers.

Among our references are companies such as Peoria Packing (USA), Danepork, and Danish Crown – all players who demand the highest standards in quality, delivery reliability, and innovation.

You benefit from our experience in delivering solutions that work in practice – even under demanding conditions. Our customers experience high satisfaction because we focus on their needs and ensure that every solution is tailored to their production and market condi-

tions. We are committed to building long-term relationships based on mutual trust and open dialogue.

The results speak for themselves: Our partners experience fewer production stoppages, increased efficiency, and higher quality in the final products. This is no coincidence – it is the outcome of a consistent strategy where we prioritize your business and your goals.

When you choose us, you choose a partner who not only talks about results but documents them through satisfied customers and successful projects.

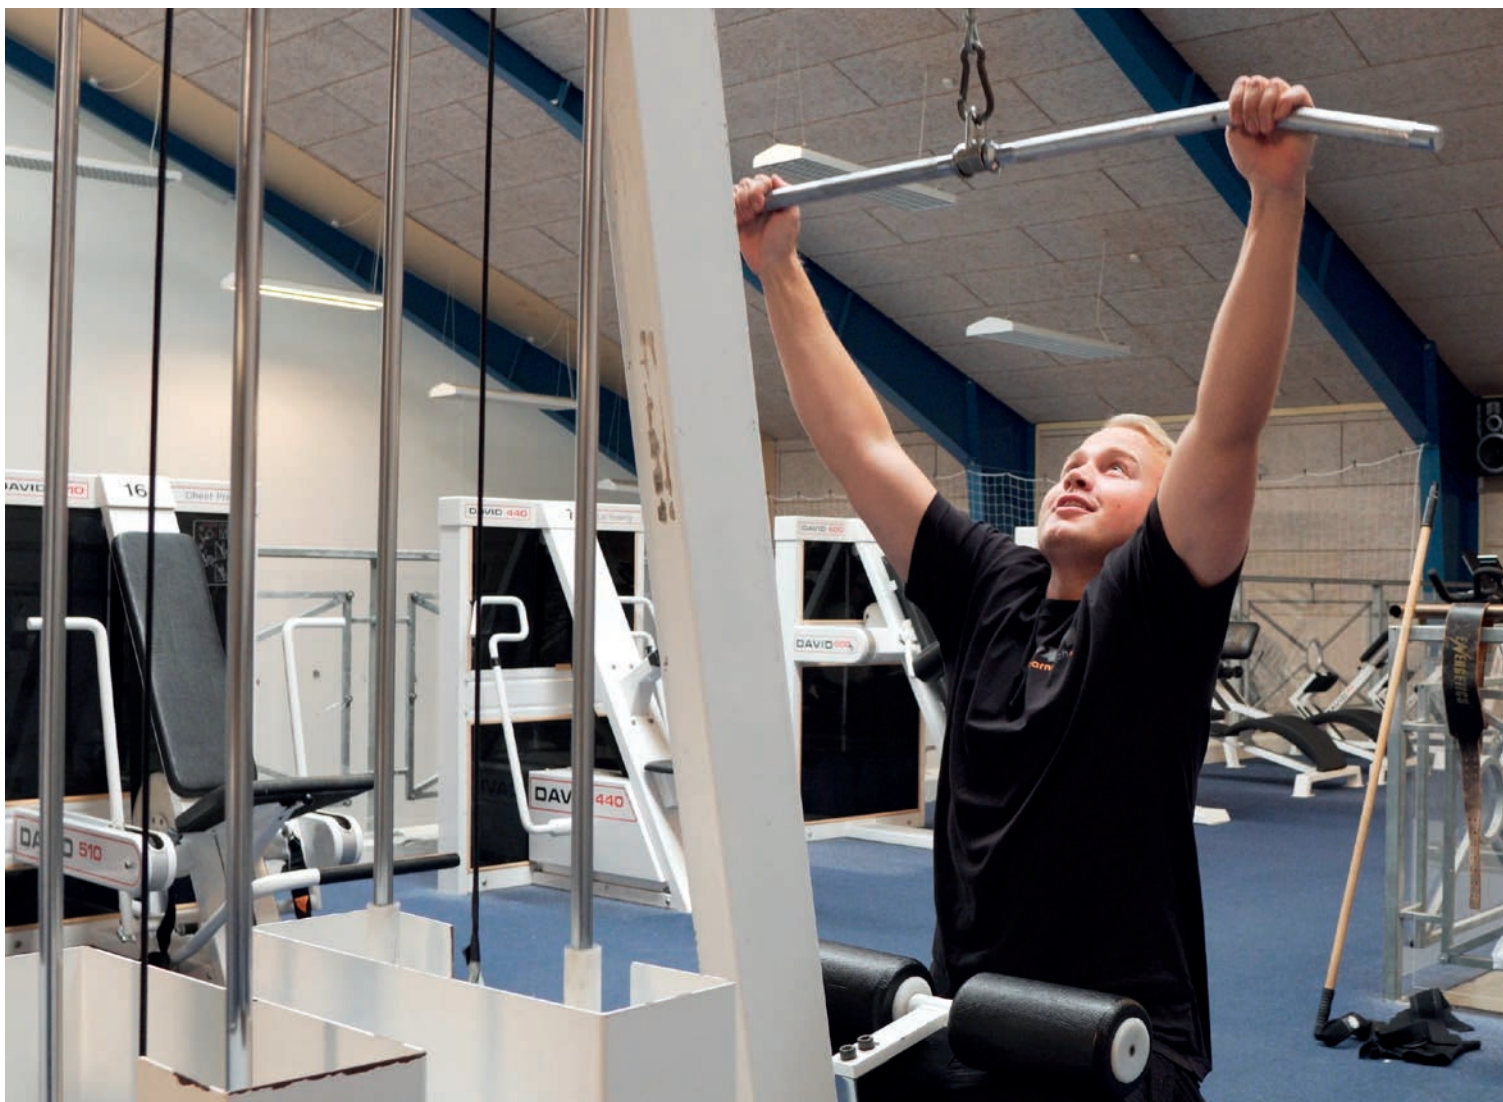

Competent Employees and Professional Conditions Create Your Value

Your business deserves to collaborate with a supplier who prioritizes employee well-being and development. At 2M Carnitech, we believe that engaged and motivated employees are the key to delivering the highest quality and best service. That's why we've invested in modern facilities such as a fully equipped fitness center, padel courts, and a brand-new spacious canteen – to ensure our team works under the best possible conditions.

You can expect our employees to enjoy significant freedom with responsibility and flexible working conditions, creating a strong community and culture where everyone contributes to delivering the best solutions for you. Our staff and sports associations further strengthen team spirit, ensuring that you always meet a dedicated team focused on creating results – also for your business.

We have a clear strategy for recruiting and retaining the best talents in the industry. This means you gain access to competent specialists who continuously update their knowledge and work with the latest technologies. At 2M Carnitech, employee well-being and development are not just goals but an integrated part of our business model. This is your guarantee that you get a partner who delivers quality – every time.
