About Us

We are Stalvoss Automation GmbH – an innovative, dynamic family business in the field of non-destructive material testing and test automation.

With our agile approach, we carry out complex and technically demanding testing tasks for customers in a wide range of industries. **Our mission:** Customized automation solutions – precise, efficient, and customer-oriented.

Our origins lie in Stalvoss GmbH & Co. KG, which specializes in special machine construction and test automation. Today, as an independent company, we are a reliable partner for businesses worldwide.

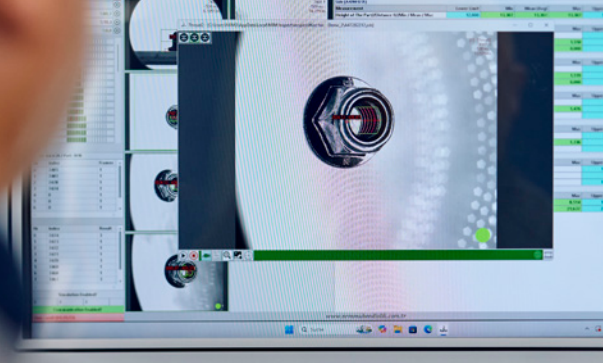

Özkan Yildirim
CEO

Our strengths

- ✓ An experienced, specialized team
- ✓ A Europe-wide partner network
- ✓ Use of innovative technologies and testing methods
- ✓ High flexibility for different industries and tasks

As a hidden champion, we supply customers all over the world from our location in Cologne – including well-known global players. We are proud of this.

*Solutions

production
to the next
level.*

Our services

Test automation is our focus: We develop systems for rollers, rings, and special parts that ensure maximum precision and can be seamlessly integrated into existing manufacturing processes.

Our services and processes include:

- ✓ Surface testing: Optical shell and end face inspection, edge and brightness testing
- ✓ Crack & structure testing: Eddy current and visual crack testing, microstructure testing
- ✓ Material & hardness testing: Material analysis, hardness testing, grinding burn testing
- ✓ Corrosion & quality control: Rust testing, general defect detection
- ✓ Sorting & process integration: OK/N.OK sorting, control and integration into production lines

In addition, we implement projects in the field of special machine construction, develop customized designs, and take care of manufacturing, assembly, and commissioning. Our range of services is complemented by tooling and interchangeable tools, service & integration, and the manufacture of turned parts (cold and hot forming).

ELOTEST \ PL650

A new dimension in eddy current testing that leaves nothing to be desired. The instrument is the innovative, fully digital eddy current platform for a wide range of applications with unique performance and reliability.

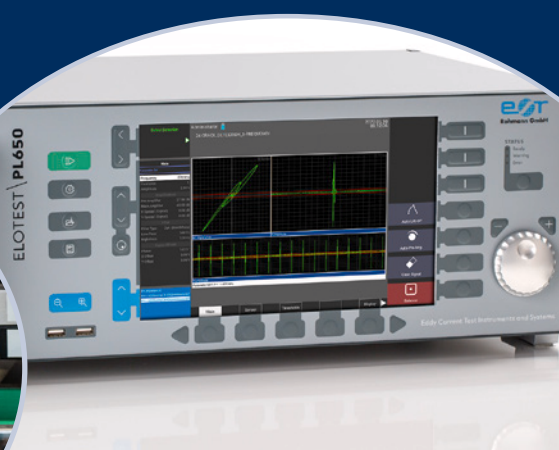

Depending on the application, the ELOTEST PL650 is available in various housing designs, with modular hardware moduls and flexible software packages. Areas of application include precise material sorting as well as crack and grinding burn testing.
