Expertise in Ceramics.

Dear customers,

Since 1996, CERA SYSTEM Verschleißschutz GmbH (CERA SYSTEM) has been an internationally operating manufacturer of high-quality components for the consumer products and automotive industries. Four years after our founding, with the acquisition of Cerpraecis, we expanded our portfolio to include wear-resistant and corrosion-resistant valves.

With a team of over 100 employees, we realize components and system solutions that are used by renowned companies within and beyond Europe. The decisive factors behind this trust are innovation, quality, and sustainability – enabling us to always provide our customers with the best, tailored solutions. In this way, we demonstrate medium-sized agility combined with global engineering competence.

Thus, the former "Keramische Werke Hermsdorf" combine, with its long tradition in the ceramics industry, has evolved into an internationally active company – and remains a competent and innovative partner at its customers' side. Discover our company and its product range. We continue to advance ceramics – for your application.

Yours sincerely,
Thomas Gietl, Managing Director

In use across many **industries.**

CERA SYSTEM Verschleißschutz GmbH provides solutions for a wide range of industries. Our products are used in:

- Mining
- Refining
- Chemicals
- Petrochemicals
- Energy
- Steel
- Paper
- Environmental technology

Our management system and quality assurance are confirmed by official certifications.

ASE
ARMATUREN, SERVICE & ENGINEERING

Individually manufactured ceramic components.

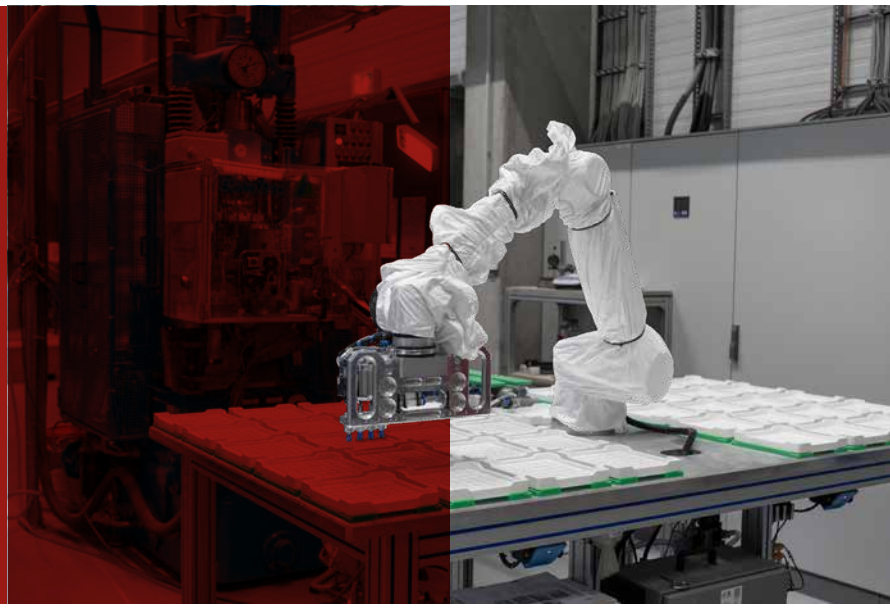

We develop and produce customer-specific ceramic components for a wide variety of applications, from small batch sizes to series production. These components are used worldwide in electronic flow meters, sensors, and control systems.

SEALING AND CONTROL DISCS

- for air-conditioning technology,
- sanitary fittings,
- and many other applications

CERAMIC COMPONENTS

- for sensor technology,
- food technology,
- and building services engineering

For all these applications, ceramics is a material that enables a great deal thanks to its unique properties. Unlike metals and plastics, technical ceramics withstand extreme temperatures, aggressive media, and mechanical stresses. Even then, the material remains dimensionally stable and durable.

FROM SENSOR TECHNOLOGY
TO MEDICAL ENGINEERING.

Another advantage of technical ceramics is its versatility. It conducts and insulates electrically, is biocompatible, hygienic, and can be produced in complex geometries. This makes it an ideal material for demanding applications.

Ihr Zulieferer für Armaturenbauteile & Wasserstofftechnik
mit über 40 Jahren Erfahrung

ARNSKÖTTER GmbH
PRÄZISIONSTECHNIK

- ISO Zertifiziert
- Umstempelberechtigt
- Abnahmemöglichkeiten (TÜV / DNV etc.)
- Bearbeitung von Sonderwerkstoffen

Fertigung präziser Dreh- & Frästeile

- maschinelle Bearbeitung von Ø20mm bis Ø1200mm
- Kugelrundschleifen und polieren
- 5-Achsbearbeitung
- Automation im Dreh- & Fräsbereich
- Einzelteile und Kleinserien
- CAD/CAM-Programmierung
- CNC-Messmaschine

Valves for the **highest demands.**

We manufacture customized valves tailored to specific requirements. Production includes every stage from mechanical fabrication to assembly and testing, including electrical qualifications.

CERAVALVE
Wear- and corrosion-resistant knife gate valves

- Precise regulation of solids-laden micro-quantities
- For completely dead-space-free designs

CERAFLEX
Ceramic hoses

- For particularly demanding applications
- Special ceramic rings vulcanized together with rubber materials
- Maximum wear resistance and flexibility
- Pressure-resistant up to 10 bar

VALVE CERAPIPE
Pipe wear protection

- Exceptionally robust and resistant
- Nominal diameter conformity for easy installation
- Constructed from a single bent form

CERAVALVE
Wear- and corrosion-resistant ball valves

- High-performance ball valve configurations for the most demanding applications
- Control and On/Off Services

ALWAYS AT THE FOREFRONT WITH INNOVATIONS.

Our product range is continuously expanded with new products. In this way, we constantly adapt our portfolio to the needs of our customers. New additions to our CERAVALVE range:

Short-pattern ball valve	Plug valve	Centric butterfly valve	Micro knife gate valve with bellows and safety packing

Harvey Lift Service

Ihr Spezialist für Gabelstapler Verkauf, Reparatur & Service - Vom erfahrenen Profi seit 1991 aller Ausführungen und bekannten Marken!

Ihre Vorteile mit uns als Gabelstapler Profis:

- Langjährige Erfahrung - und somit viel Know-How im Umgang mit Gabelstapler
- Ausschließlich auf Gabelstapler Technik spezialisiert
- Große Auswahl an Gabelstaplern aller Art
