ACCULUX – PIONEER OF RECHARGEABLE LIGHTING

For over eight decades, AccuLux has stood for one of the most important commodities in critical situations: reliable lighting. As a brand from Witte + Sutor, AccuLux combines technical pioneering with a clear commitment to safety, quality, and sustainability –

Made in Germany!

In 1955, AccuLux made history: with the development of the world's first rechargeable light, the company laid the foundation for a completely new type of mobile lighting. Over 100 patents, millions of lights in use and continuous further development make AccuLux one of the most influential manufacturers in its industry.

SAFETY WITHOUT COMPROMISE: ATEX-CERTIFIED AND EXPLOSION-PROOF

AccuLux specializes in explosion-proof and ATEX-certified lights, developed for use in situations where failure is not an option. Whether in firefighting, industry, energy supply, chemical, biogas, or sewage treatment plants: AccuLux lights are used wherever reliable light is required.

- ▶ because safety and quality require experience
- ▶ because innovation means responsibility
- ▶ because technology is only good if it works in an emergency

Ihr Partner für:

- Elektronikfertigung
- Entwicklung Hard- und Software
- Gerätemontage
- Maschinensteuerungen
- Schaltschrankbau
- Kabelkonfektionierung

When safety allows no compromises

Our innovative, rechargeable, explosion-proof articulated headlamps, handheld spotlights, and work lights with emergency lighting functions are mainly manufactured at our facility in Murrhardt / Baden-Württemberg are ATEX-certified, and comply with the DIN standard for fire departments. In addition, many of our lights are independently tested by the renowned IZM Fraunhofer-Institut.

Thanks to its compact design, our rechargeable WL 6000 LED spotlight is ready for use within a few seconds, either stationary on the tripod or directly in a professional environment via the standard spigot adapter. Robust, with a brightness of up to 6000 lumens, weatherproof and durable, it is a real powerhouse for demanding tasks.

TYPICAL AREAS OF APPLICATION

- Fire departments, technical relief services, and rescue services
- Police and disaster control
- Industrial and production facilities
- Energy, oil, gas, and biogas plants
- Municipal utilities and infrastructure facilities
- Crafts, maintenance, and service
- Outdoor and temporary work assignments
