

ENVIRONMENTAL SIMULATION

FROM THURINGIA

ABOUT US

YOUR PARTNER FOR ENVIRONMENTAL SIMULATION AND CLIMATE TESTING TECHNOLOGY

Since 1941, Feutron has been synonymous with innovative solutions in the field of environmental simulation and climate testing technology. Based in Thuringia, we develop and manufacture high-quality test chambers and cells that are used in a wide variety of industries worldwide. Our experience and technical expertise make us a sought-after partner for companies that place the highest demands on quality and reliability.

We support our customers from the initial idea to the finished solution—individually, efficiently, and with a focus on the future. Whether it's a standard product or a custom-built system: We precisely implement your requirements and ensure that your products can be tested under real-world environmental conditions. Discover the diversity of our services and learn how we set new standards together with you.

Our solutions deliver safety, efficiency, and innovation—for your products and your processes.

Are you planning a new project or in need of a customized solution in the field of environmental simulation? Our team will be happy to advise you and work with you to develop the optimal solution for your needs. Take advantage of our experience, our expertise, and our dedication.

SERVICE AND SUSTAINABILITY

EXPERT SUPPORT FOR SUSTAINABLE SOLUTIONS

Our service doesn't end with the delivery of your system. We support you throughout the entire lifecycle of your test chambers and cells—from installation and maintenance to modernization.

Our services:

- Fast and expert support in the event of a malfunction
- Regular maintenance and inspection
- Spare parts service and retrofits
- Training for your employees

RESPONSIBILITY FOR THE ENVIRONMENT

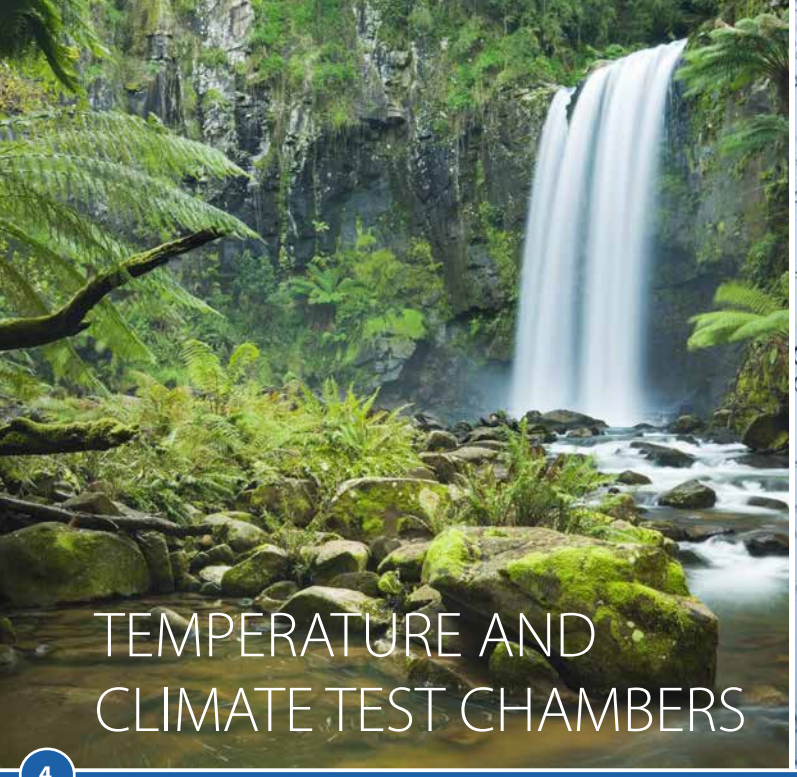

We take responsibility for our employees, our customers, and the environment. For us, sustainability is not just a buzzword, but a way of life. Through energy-efficient technologies, resource-conserving processes, and responsible collaboration, we contribute to a better future.

Our initiatives:

- Environmentally friendly manufacturing
- Efficient energy use
- Support for regional projects
- Long-term employee development

state-of-the-art CNC metalworking machines

TEMPERATURE AND CLIMATE TEST CHAMBERS

VERSATILITY AND PRECISION

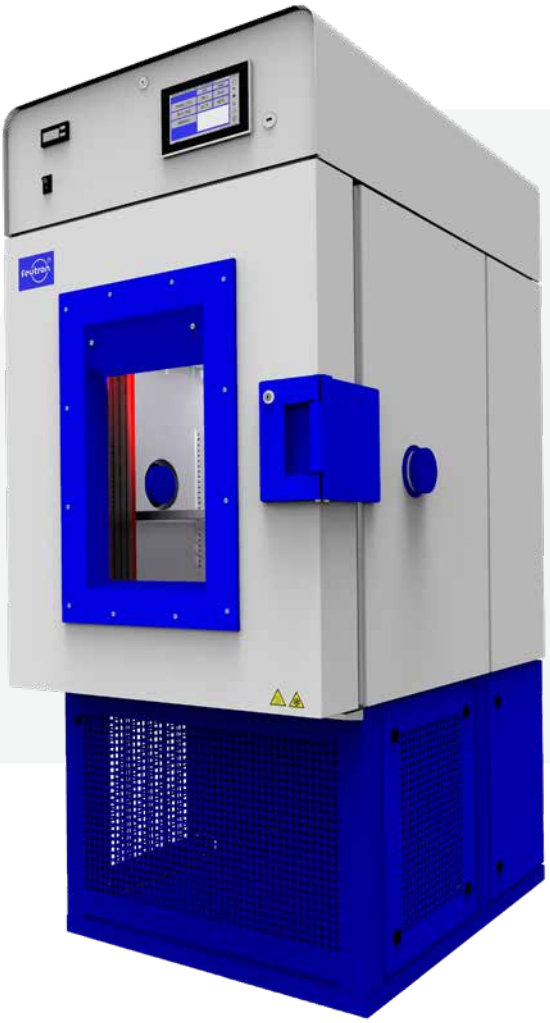

Our temperature and climate test chambers allow you to realistically simulate a wide variety of environmental conditions. Temperature, humidity, rapid transitions—with our standard chambers, you can test your products reliably and efficiently.

Features:

- Precise control of temperature and humidity
- Rapid temperature changes
- Wide range of sizes and configuration options
- Energy-efficient and easy to maintain

Special features:

- Customized adaptations to your testing requirements
- Additional measurement and monitoring technology
- Expandable test chambers

TPK-KPK 100

Our chambers are the result of years of development and are continuously adapted to meet our customers' needs. This ensures that you receive the right solution for every challenge.

TEST CELLS

CUSTOM TEST CONDITIONS FOR YOUR PRODUCTS

Feutron test cells are the ideal solution when standard chambers reach their limits. We design and build custom test cells that are precisely tailored to your requirements. Whether for large test specimens, specific temperature ranges, or complex test sequences—we work with you to develop the optimal solution.

Advantages:

- Flexible chamber sizes and shapes
- Integration of specialized test and measurement technology
- High energy efficiency and safety
- Scalable and future-proof

Weathering chambers

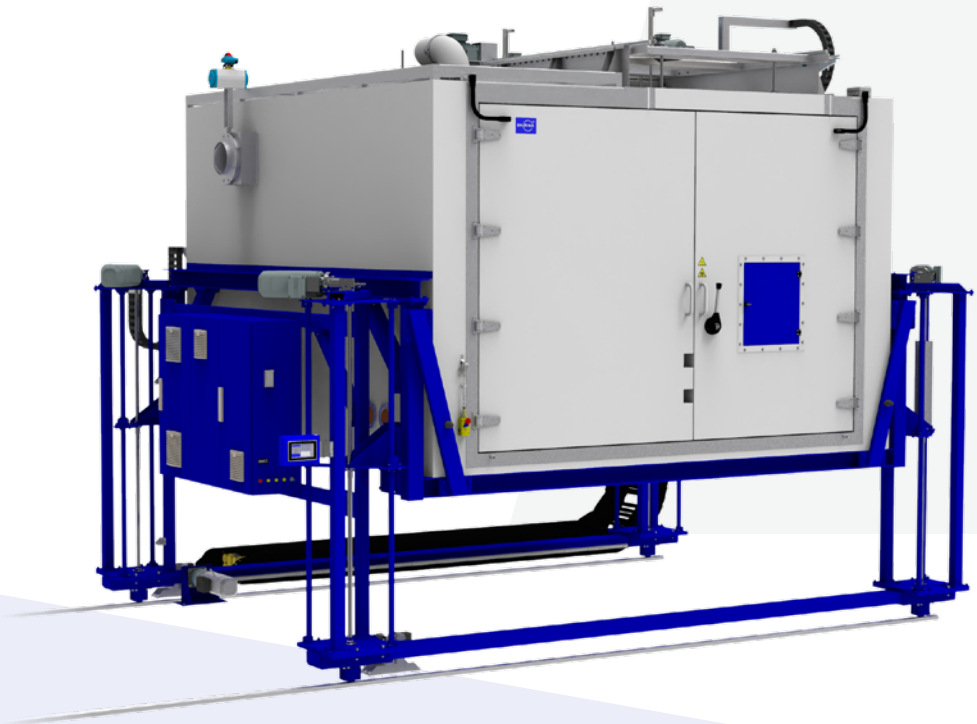

CUSTOM SYSTEMS

YOUR IDEA, OUR TECHNOLOGY

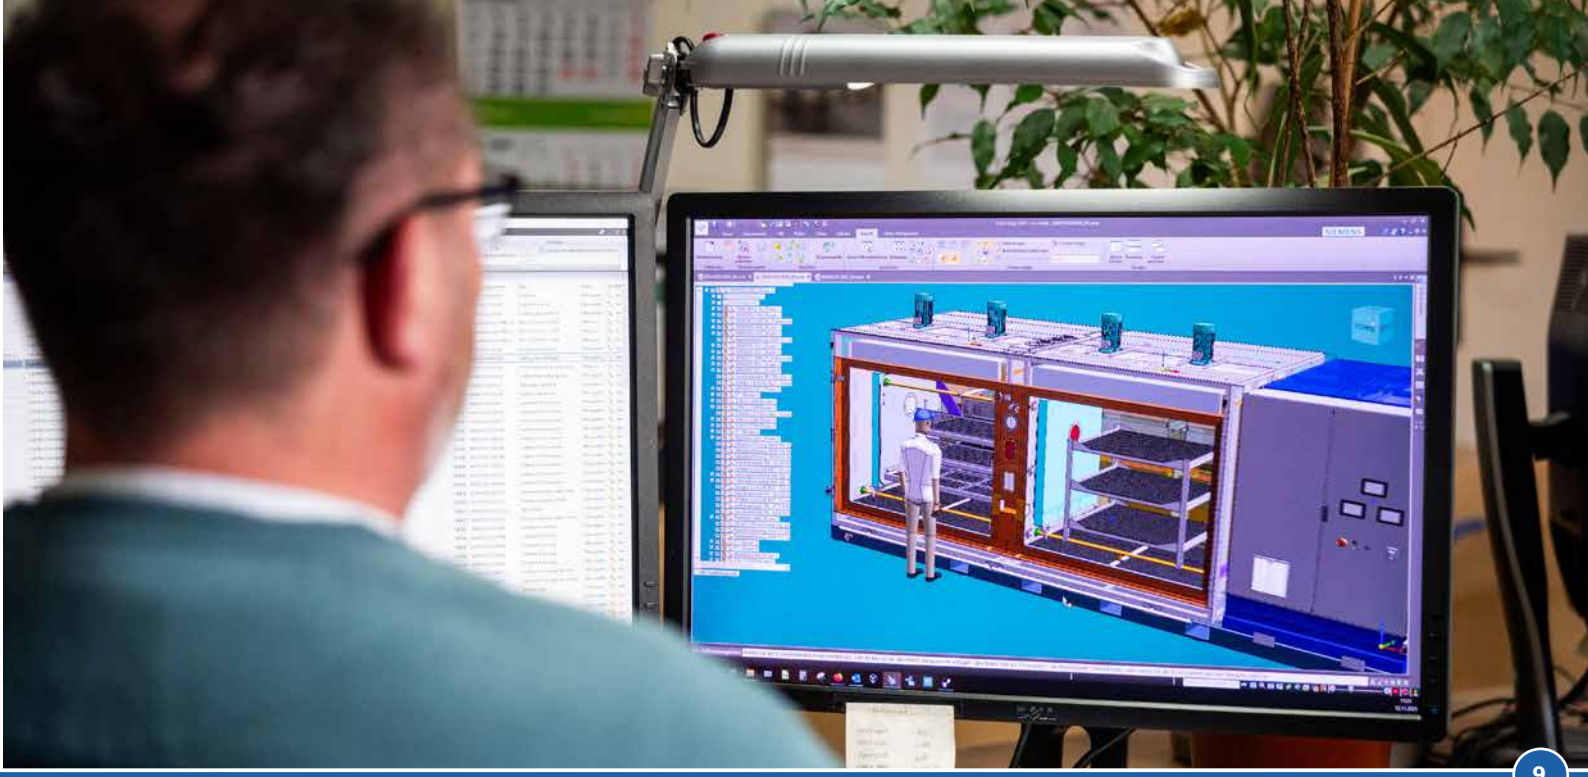

When standard solutions aren't enough, we work with you to develop custom systems that are precisely tailored to your processes and products. Our team supports you from the initial concept through to commissioning and ensures that your system meets all relevant regulations and safety standards.

Our services:

- Consulting and planning of custom systems
- Implementation of complextesting processes
- Integration into existing production environments
- Comprehensive service and support

Climate test chamber with 24,000 L test chamber volume for shaker applications

Our experience in custom machine building enables us to reliably meet even the most unusual requirements. You can count on our expertise when it comes to custom testing tasks.

feutron

A CAREER WITH PROSPECTS

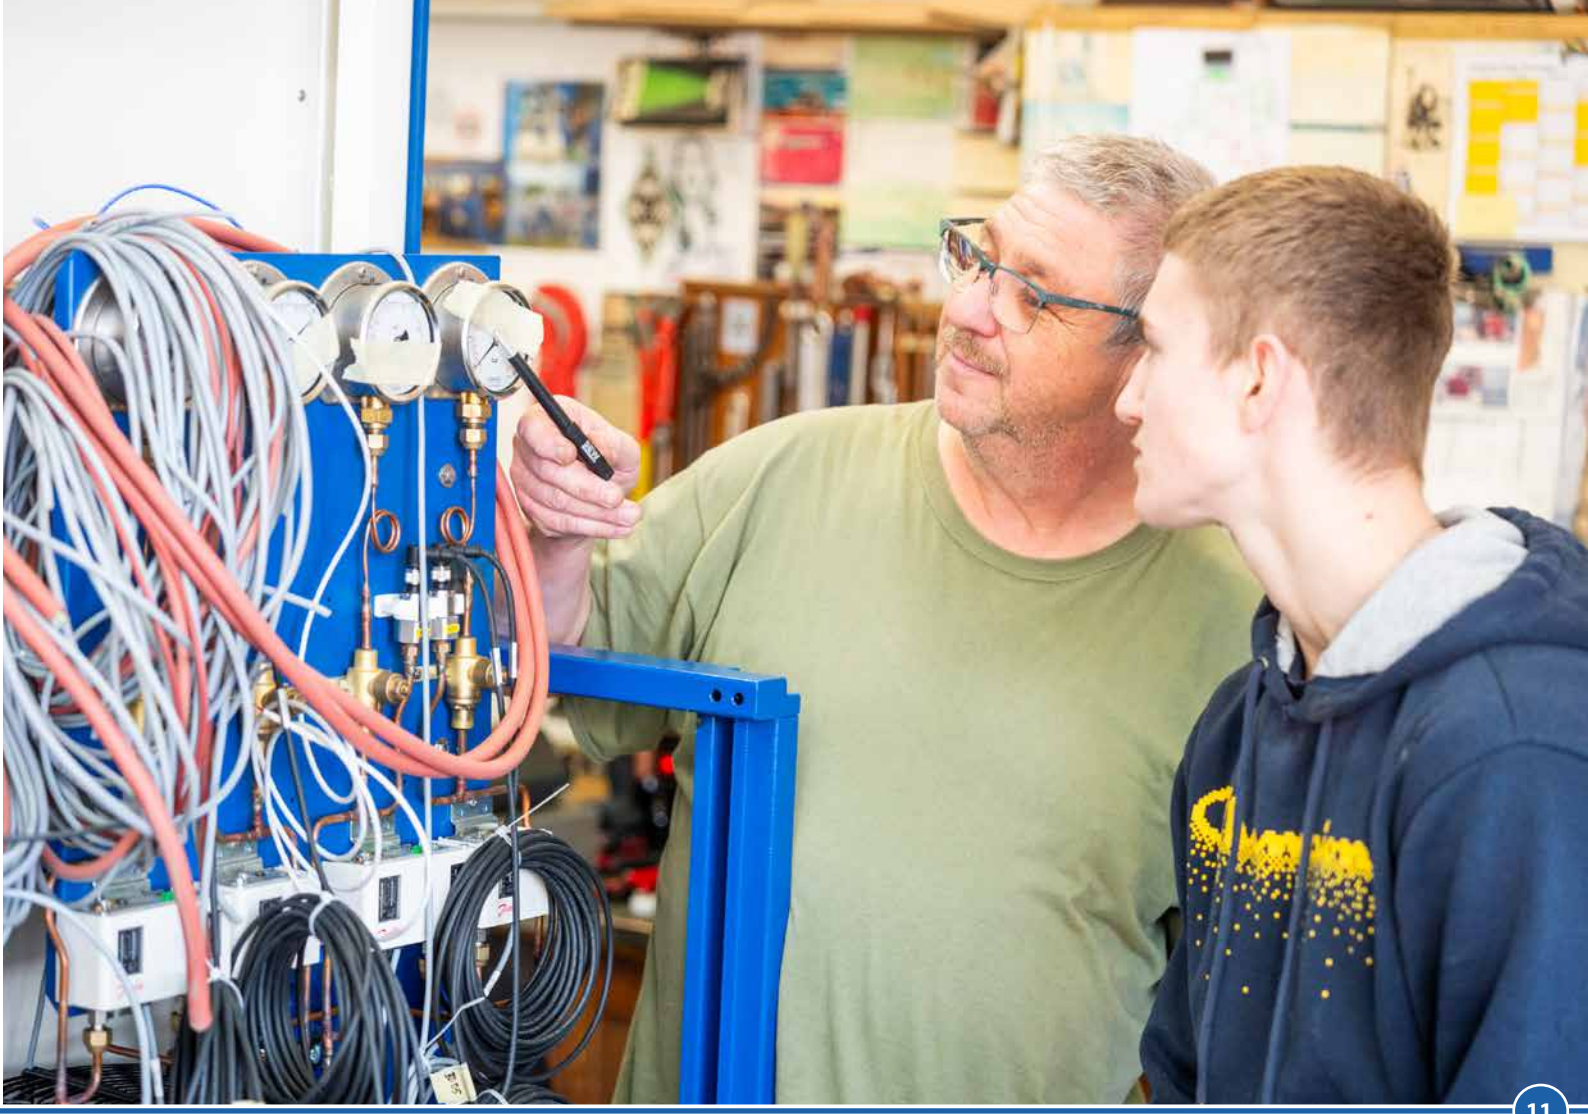

We invest in the skilled workers of tomorrow. As a recognized training company, we offer young people exciting opportunities in a future-proof environment. Our trainees benefit from experienced instructors, state-of-the-art technology, and a wide range of development opportunities.

Here's what you can expect from us:

- Hands-on training with real-world projects
- Personal guidance and support
- Modern workplaces and innovative technology
- Opportunities for permanent employment after completing your training

Feutron®

Join our team and start your career at Feutron!!

WHAT OUR EMPLOYEES SAY:

At Feutron, I can fully pursue my interest in technology and learn something new every day. The team supports me, and I feel right at home here.

Präzision braucht einen starken Partner

Mehr Betriebssicherheit. Weniger Risiko. Volle Kontrolle.

In der Umweltprüfung ist jedes Detail entscheidend. Rittal verbindet robuste Hardware mit effizienter Eplan Software, smarter Automatisierung und leistungsfähiger IT-Infrastruktur. Dadurch erhalten Sie eine verlässliche Basis, die mit jeder Herausforderung wächst. Alles aus einer Hand, alles aufeinander abgestimmt. Damit Ihre Technik nicht nur funktioniert, sondern überzeugt.
