

Service, repair and technical know-how – all in one place

At P/F Frost, our workshop is a central part of our service setup. Here, we repair, service, prepare and inspect refrigeration equipment, helping our customers keep their cooling and freezing solutions running safely and efficiently.

From technical troubleshooting to planned maintenance, our workshop supports customers on land and at sea with practical expertise, fast response and reliable solutions.

A strong workshop behind strong cooling solutions

The workshop at P/F Frost is an important part of our technical setup. This is where our technicians repair, troubleshoot, prepare and maintain refrigeration equipment and technical components for a wide range of customers.

By handling many tasks in-house, we are able to provide a more efficient process – from the first technical assessment to the final solution. Whether

the task involves repair, preparation, spare parts or support for our customers, the workshop helps ensure a faster and more reliable result.

Together with our warehouse and technical team, the workshop gives P/F Frost a strong foundation for solving both planned and urgent assignments.

The workshop supports with:

- Repair
- Troubleshooting
- Preparation
- Maintenance
- Technical assessment
- Spare parts support
- Support for customers and technicians

From fault to function

When a refrigeration system or component does not perform as expected, it is important to identify the cause quickly and accurately. At P/F Frost, our workshop allows us to inspect, test and repair equipment, giving the customer a clear assessment of whether a component can be brought back into operation – or whether replacement is the better solution.

Our technicians work with both practical experience and technical precision. This helps reduce unnecessary replacement, extend the lifetime of equipment and support stable operation for customers where downtime can be costly.

We focus on:

- Troubleshooting refrigeration components
- Repair before unnecessary replacement
- Testing and inspection before delivery
- Technical support for service technicians
- Reliable solutions for demanding environments

Stock, service and fast response

Reliable refrigeration requires more than technical expertise alone. It also requires access to the right components, spare parts and equipment when the customer needs them.

At P/F Frost, our warehouse plays an important role in our daily work. With a wide range of refrigeration components, spare parts, oils, gases, valves and technical equipment in stock, we are able to support both workshop repairs and on-site service assignments efficiently.

Our technicians operate from 10 fully equipped service vehicles, allowing them to respond quickly and bring the necessary tools, spare parts and equipment directly to the customer. This makes P/F Frost well prepared for both planned service, statutory inspections and urgent assignments.

Warehouse and spare parts

A well-stocked warehouse helps us support customers faster and keep critical refrigeration systems running.

Statutory inspections

We perform required inspections and technical reviews of refrigeration systems to help customers meet legal requirements.

Emergency service

Our service team is available when urgent assistance is needed – helping customers get back in operation as quickly as possible.

The right solution starts with the right advice

The workshop and warehouse do not stand alone. They are part of P/F Frost's complete technical setup, where our office, sales team, technicians and suppliers work closely together to find the right solution for each customer.

From the office, our team handles quotations, spare parts, supplier contact and technical coordination. This ensures that customers receive qualified advice, clear offers and access to the right components at the right time.

With experience across fisheries, industry, food service, refrigerated containers and marine cooling, we understand that every solution must match the customer's operation, technical requirements and budget.

Our office supports with:

- Quotations and customer dialogue
- Spare parts and components
- Supplier coordination
- Technical advice
- Repair or replacement guidance
- Planning of new solutions

Experience that makes a difference

Because we work closely across office, warehouse and workshop, we can think practically, quickly and solution-oriented. This helps customers make informed decisions – whether the need is a repair, a new installation, spare parts or technical support.
