PASSION FOR PADEL

100% MADE IN SPAIN

MORE THAN COURTS
WE BUILD THE FUTURE OF PADEL

For more than two decades, at ManzaSport we have been designing, manufacturing and installing padel courts for clubs, sports facilities, hotels, residential developments and international competitions.

From our facilities in Valencia, we control every stage of the process to guarantee the highest quality and offer fully customised solutions, tailored to the technical, aesthetic and functional requirements of each project.

Our experience, industrial capacity and international outlook have enabled us to bring our courts to more than 70 countries across Europe, the Middle East, the Americas, Asia and Africa.

We are manufacturers

We design, manufacture and install our own courts, maintaining direct control over materials, production, finishes and installation.

This capability allows us to offer reliable solutions, optimise production lead times and respond quickly to both national and international projects.

One team, one purpose
The highest quality

behind every installation there is a team of professionals specialising in design, manufacturing, engineering, logistics and installation. Their experience, precision and commitment ensure that every detail of the project is carefully managed, from the initial proposal through to the court's commissioning.

ManzaSport is led by Juan Antonio Senent, CEO of the company, whose vision, experience and passion for the sport have helped establish the company as an international benchmark in padel court manufacturing.

Because a great court is not built with steel and glass alone. It is built with knowledge, experience and the commitment of a team working to take padel further and further.

Our philosophy is based on

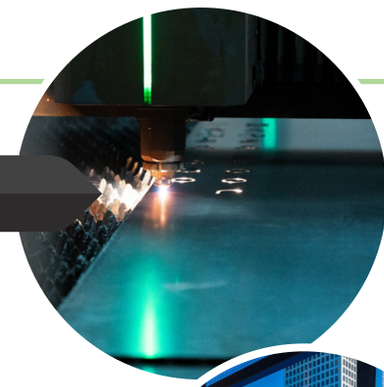

Innovation
Technology
and continuous improvement
in every detail.

Quality
High-performance
materials and
maximum durability.

Commitment
We meet deadlines, take
care of every installation and
support our clients.

Services

- Sports facility design
- In-house manufacturing
- Complete installation
- Turnkey projects
- Court customisation
- Technical consultancy
- Training and commissioning
- Maintenance and after-sales service
- Court renovation
- Replacement of glass panels and components
- Supply of spare parts

Facilities
In-house manufacturing, quality without compromise

Our facilities bring together technology, experience and a highly specialised team to manufacture padel courts to the highest quality standards. We have three production centres located in Beniparrell, Valencia, dedicated to the manufacture of padel courts, structures and accessories.

Our factories have been designed to manage every stage of the process in-house:

- **Selection and preparation of materials.**
- **Cutting and machining.**
- **Customisation through laser cutting.**
- **Assembly of structures.**
- **Surface treatment and finishing.**
- **In-house painting.**
- **Quality control.**
- **Logistics preparation and dispatch.**

This industrial capacity allows us to guarantee product traceability, optimise production lead times and offer solutions tailored to projects of different sizes.

We manufacture in accordance with the specifications of the International Padel Federation and the regulations applicable to sports facilities established by the Spanish National Sports Council, NIDE 2021.

Exclusive distributors

A COURT FOR EVERY PROJECT

Every installation has different requirements. That is why we have developed a complete range of courts combining design, durability, safety and customisation to suit any space and level of competition.

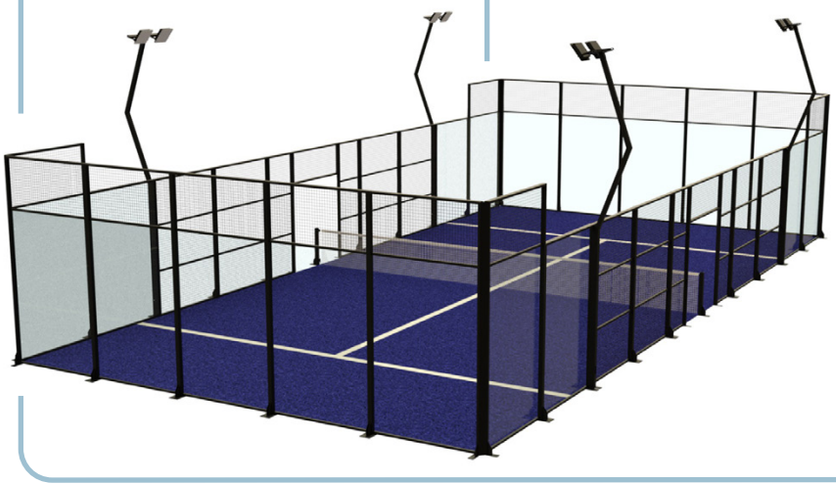

Padel Doha - Qatar

Manza Model

Designed for international and export projects.
A robust, versatile and efficient solution.

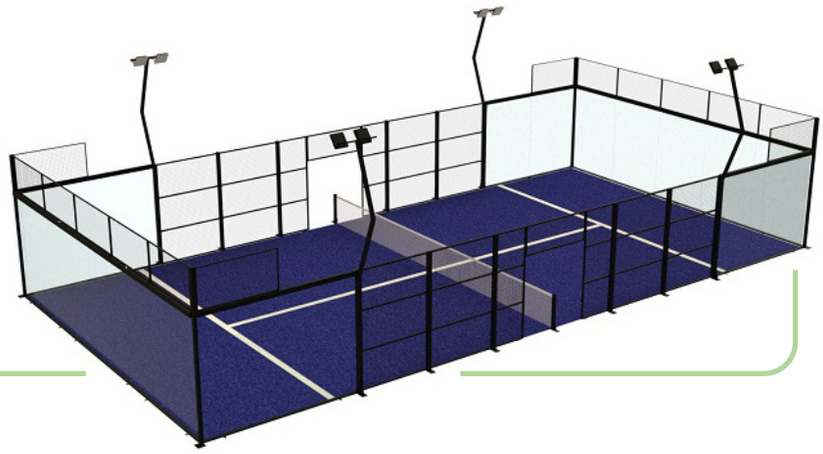

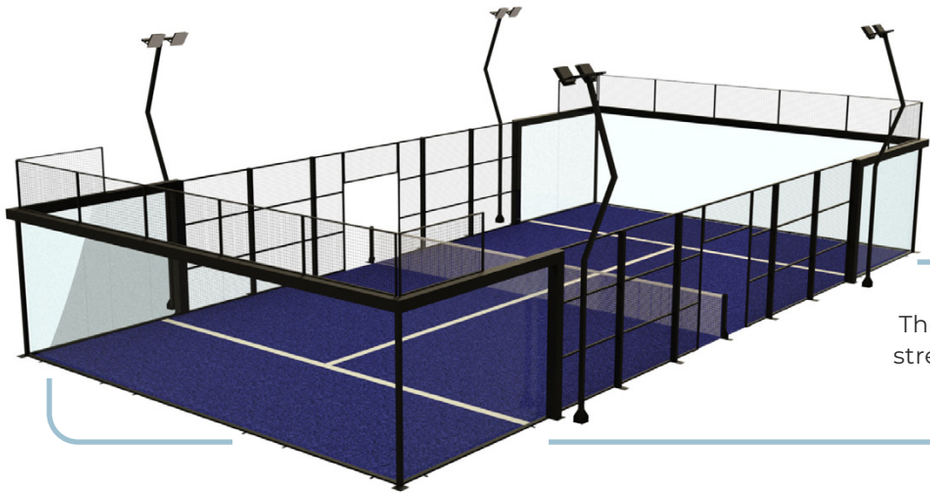

Pro Model

Our most versatile model. Quick installation, excellent structural performance and great value for money.

Miami Model

Elegant panoramic design offering an excellent visual experience for players and spectators.

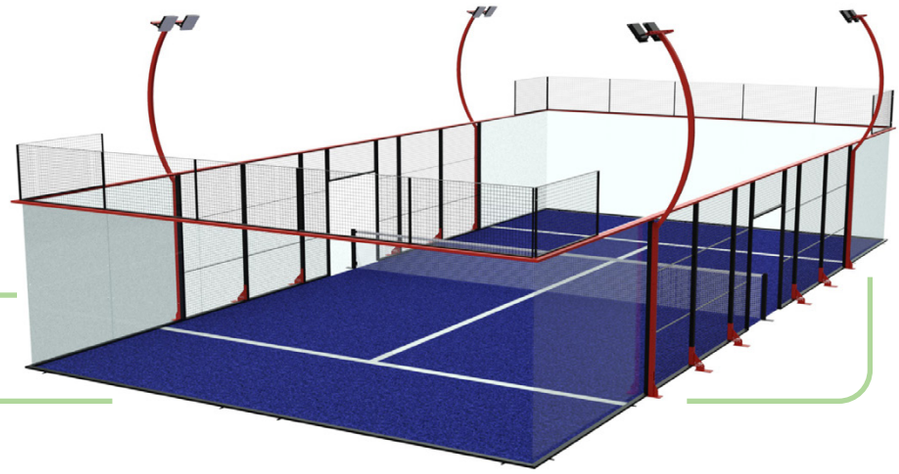

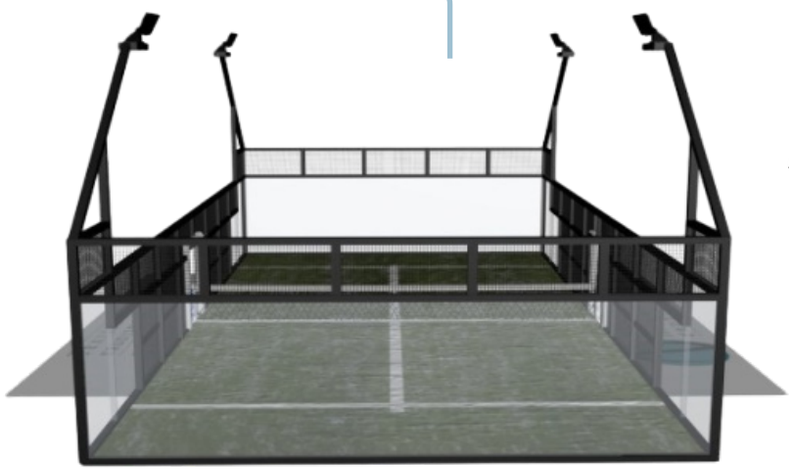

Paquito Gold Model

The panoramic court with maximum strength, developed to withstand the most demanding conditions.

Central court

Designed for professional competitions and major sporting events.

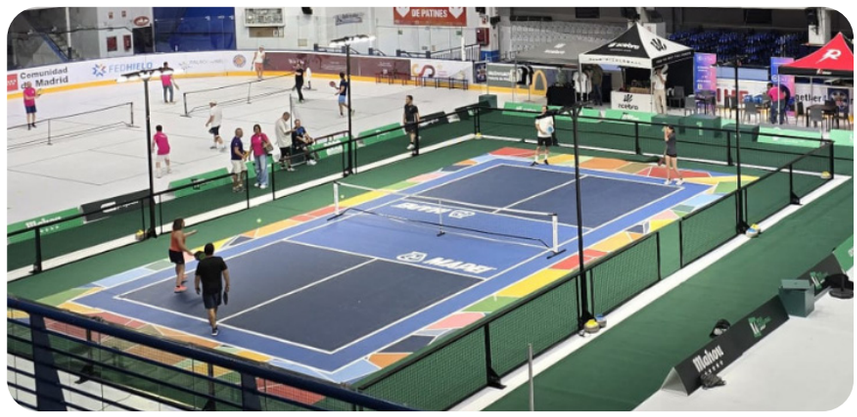

Custom padel court

Choose finishes, colours, details and solutions tailored to the needs of your project.

Pickleball court

We create pickleball courts for clubs, hotels, sports centres and multi-sport facilities, adapting to your project.

International outlook

Local manufacturing, global presence

Our projects are present in more than 70 countries, bringing our experience to clubs, sports complexes, hotels, public facilities and international competitions.

Our courts have hosted some of the most prominent events in international padel, including Premier Padel, World Padel Tour, A1 Padel, Tomorrowland and major sporting exhibitions held in Madrid, Rome, Miami and Doha.
